**Subject: Jurisdictional Waters Determination
Clinton Sycamore Tract
Laurens County, SC
PEC Project #11-0395**

Dear Mr. White:

Palmetto Environmental Consulting, Inc. (PEC) is pleased to provide this information regarding the Clinton Sycamore Tract, located in Laurens County, South Carolina. PEC was authorized to determine the locations of the upper limits of four stream segments on the subject site.

In September 2011, PEC biologists conducted a preliminary determination to identify the upper limits of four stream segments. The site generally consists of recently clear-cut uplands with rolling hills and loamy soils. The upper limits of the streams were observed and located by GPS. Each of the streams appears to flow northwest and off the subject site. Please see the map for the locations of the upper limits of the streams.

Should you have any questions, please contact Robert Bunch at (803) 791-1033.

Sincerely,
PALMETTO ENVIRONMENTAL CONSULTING, INC.
