Attention:

Mr. Kyle Clampitt, P.E.

Reference:

Phase I Environmental Site Assessment

Hunter Industrial Park ~ 380 Acres Interstate 385 and U.S. Highway 221 Laurens County, South Carolina S&ME Project No. 1614-10-270

Dear Mr. Clampitt:

S&ME, Inc. has completed the Phase I Environmental Site Assessment (ESA) for the referenced property. The attached report presents the findings of S&ME's Phase I ESA which was performed in general accordance with ASTM E 1527-05 as authorized by your acceptance of S&ME Proposal No. 1614-7410-10, dated March 11, 2010 and the Master Services Agreement between Alliance Consulting Engineers and S&ME dated January 15, 2007.

S&ME appreciates the opportunity to provide this Phase I ESA for the project. Please contact us at your convenience if there are questions regarding the information contained in this report.

Sincerely,

S&ME, Inc.

Chris Daves, P.W.S.

Biologist

Thomas Behnke, P.G.

Environmental Department Manager

 \mathbf{E}

SUMMARY

S&ME, Inc. has performed a Phase I Environmental Site Assessment (ESA) of the approximately 380-acre site located southwest of the intersection of Interstate 385 and U.S. Highway 221 approximately 2 miles north of downtown Laurens in Laurens County, South Carolina. This Phase I ESA was authorized by Ms. Rebecca Murrell with Alliance Consulting Engineers, Inc. (Alliance). The following summary is intended as an overview of the Phase I ESA, and does not include the complete findings and opinions of the full report.

The subject site consists of vacant cleared land, cut-over timber land, and timber land. Currently, the site is adjoined by timber land and light industrial facilities within the Hunter Industrial Park. Historically, the site has been used as timber land since at least 1964 to the present. Before this time it was partially cleared and contained at least two residences and several unpaved roads.

A site visit was conducted on July 22 and 29, 2010 by S&ME environmental professional, Chris Daves and S&ME Biologist Amanda White. The site visit was conducted in order to evaluate the subject site for drainage patterns, vegetation patterns, stains, discoloration, surrounding land use, and other visual aspects suggestive of the presence of Recognized Environmental Conditions (RECs).

On-Site Findings

No on-site findings of an environmental nature were identified during the Phase I ESA.

Off-Site Findings

The review of the public record including the EDR Radius Map Report and other public records identified ten (10) off-site facilities with listings related to hazardous materials or petroleum products in the vicinity of the subject site.

- Fukoku America, Inc. Adjoining property to the west; RCRA-SQG database.
- Unifor Brass Forging, Inc. Adjoining property to the east; RCRA-SQG database.
- **Box USA Group, Inc./ International Paper** 500 ft. north; RCRA-SQG database.
- Wal-mart Distribution 500 ft. east; UST, LUST, GWCI, RCRA-SQG databases.
- **Builders Transport, Inc.** 750 ft. north; RCRA-SQG database.
- St. Joe Container Co. 750 ft. north; UST and LUST databases.
- Ernestine Starnes Property 1,000 ft. southeast; UST, LUST, and GWCI databases.
- Cox's Gulf Service 1,000 ft. northeast; UST, LUST, and GWCI databases.
- **JC's Auto Truck** 1,000 ft. northeast; UST database.
- **Hickory Tavern** This property is thought to be located outside the search radius.

In our opinion, the above regulated facilities do not appear to constitute a REC in connection with the subject site at this time based on topographic position relative to the site, distance, and/or current regulatory status.

This Phase I ESA has revealed no evidence of RECs in connection with the subject site.

1.0 INTRODUCTION

1.1 Purpose

The purpose of this Phase I Environmental Site Assessment (ESA) was to identify, to the extent feasible pursuant to the processes described herein, *recognized environmental conditions* in connection with the subject site. This Phase I ESA was prepared in accordance with the standard developed by the American Society for Testing and Materials (ASTM) entitled "E 1527-05 Standard Practice for Environmental Site Assessment: Phase I Environmental Site Assessment Process" (ASTM E 1527-05).

ASTM defines the term *recognized environmental condition* as the presence or likely presence of hazardous substances or petroleum products on the property under conditions that indicate an existing release, a past release, or a material threat of a release of hazardous substances or petroleum products into the structures on the property or into the ground, groundwater, or surface water of the site. The term does not include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of enforcement action if brought to the attention of appropriate governmental agencies.

1.2 Detailed Scope of Services

Unless specifically authorized as an addition to the Phase I ESA work scope, the assessment did not include any assessment of environmental conditions not specifically included in the ASTM E 1527-05 standard such as the assessment of business risk issues such as; lead in drinking water; mold, fungi or bacteria in on-site buildings; regulatory compliance; cultural/historic risks; industrial hygiene; health/safety; ecological resources; endangered species; indoor air quality including possible vapor intrusion; radon or high voltage power lines.

S&ME's approach to performing this Environmental Site Assessment consisted of four major tasks in accordance with the ASTM Standard Practice E 1527-05.

<u>Task 1</u> - A review of reasonably ascertainable and practically reviewable public records for the site and the immediate vicinity was conducted to characterize environmental features of the site and to identify past and present land use activities, on or in the vicinity of the site, which may indicate a potential for *recognized environmental conditions*. The review of the public record included:

 Review of reasonably ascertainable federal, state and tribal standard environmental record sources as well as selected local sources in accordance with the specified minimum search distances in ASTM E 1527-05. The search of these records was performed by a firm specializing in this service subcontracted to S&ME with results presented in a written report that will be appended to S&ME's Phase I ESA report.

- 2. Examination of one or more of the following resources: aerial photographs, fire insurance maps, property tax records, street directories, USGS topographic maps, building department records, planning department data, fire department or health department records, town historian and zoning/land use records of the property and vicinity for evidence suggesting past uses that might have involved hazardous substances or petroleum products.
- <u>Task 2</u> A site reconnaissance was performed to identify visible signs of environmental conditions on or adjacent to the site, and to evaluate evidence found in the review of public record that might be indicative of activities resulting in hazardous substances or petroleum products being used or deposited on the site. The site reconnaissance included the following activities:
 - 1. A visual reconnaissance of the site and adjacent properties to observe signs of spills, stressed vegetation, buried waste, underground or aboveground storage tanks, subsidence, transformers, or unusual soil discoloration which may indicate the possible presence of contaminants on the property.
 - 2. The periphery of the property was viewed and a walk-through of accessible areas of the site interior was conducted.
 - 3. Areas of the site were photographed to document the current use(s) of the property as well as significant conditions such as unusually discolored soil, stressed vegetation, or other significant features associated with the property.
- <u>Task 3</u> Inquiries with appropriate local officials were conducted to consider any local knowledge of hazardous substances or petroleum products on the subject property or on adjacent properties. In addition, the current owner of the property was interviewed regarding his knowledge of any hazardous substances or petroleum products on the subject property or on adjacent properties.

<u>Task 4</u> - The collected data were evaluated and this report was prepared.

1.3 Significant Assumptions

- The slope of the water table under static conditions (no pumping interference) often approximates the land surface topography in the area. Thus, the movement of groundwater is assumed to be in approximately the same direction as the drop of the topographic slope.
- Information acquired from the public record and interviews is accurate and reliable.
- Existing creeks and perennial surface waterways are either losing to or gaining from the groundwater regime. Thus, existing creeks and perennial surface waterways delineate the locations of hydrogeologic barriers for flow within the subsurface groundwater regime.

1.4 Limitations and Exceptions

The findings of this report are applicable and representative of conditions encountered at the subject property at the time of this evaluation, and may not represent conditions at a later date. The review of public records was limited to that information which was available to S&ME at the time this report was prepared. Interviews with local and state government authorities were limited to those people whom S&ME were able to contact during the preparation of this report. All information was derived from practically reviewable, readily available sources in compliance with the standards set forth in ASTM E 1527-05.

Although this report satisfies ASTM E 1527-05, these results are not a guarantee or warranty that no environmental conditions exist or that the property is free from all contamination. The Standard was developed to outline appropriate inquiry into the assessment of real property and therein "reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions."

The opinions presented in this report are based on findings derived from a site reconnaissance, a review of specified regulatory records and historical sources, and comments made by interviewees. Generally, information obtained from public records and from interviews is reliable. However, S&ME cannot warrant or guarantee that information provided is complete or accurate. In the event responses requested by S&ME from public agencies are provided to S&ME following the submittal of our report, they will be forwarded to the client in the form received for evaluation by the client.

Additional limitations to this Phase I ESA are as follows:

- Standard historical sources were not reasonably ascertainable to trace the operational
 history of the property back to its undeveloped state or to document the land use in
 approximately five-year intervals.
- Due to small scale and in some cases poor resolution of historical aerial photographs, only limited detailed review of historic site conditions was feasible.
- A complete chain of title or a title commitment was not provided for review of Activity Use Limitations (AULs), Engineering Controls (ECs), or environmental liens.
- The property boundaries of the site were approximated based on user provided information and field observations. An exact site plan or plat of the property was not provided.

1.5 Special Terms, Conditions and Reliance

All materials and information used for this project were obtained by S&ME. The resulting report is provided for the sole use of Alliance (the user) on the project for which it was prepared. Use of this report by any additional parties will be at such parties' risk, and S&ME disclaims liability for any use or reliance by any additional parties.

Alliance may request in writing additional reports, name another party or parties as addressee(s) or otherwise entitle the party or parties to rely on the report. Such request for additional addressees shall include the name and addresses of the additional addressees and any suggested wording the additional addressee wishes S&ME to consider for inclusion in the report.

S&ME shall have sole discretion in (1) approving client's request for issuance of reports to additional addressees, and (2) incorporating in our report any additional wording or deletions requested by the additional addressees. The additional addressees' use and reliance on the report will be subject to the same rights, obligations, and limitations imposed by the current contract with Alliance. However, the <u>total</u> liability of S&ME to all addressees' of the Phase I ESA shall be limited to the remedies and amounts as provided in the current standing contract. The additional addressees' use and reliance on the report shall signify the additional addressees' agreement to be bound by the contract that makes up the agreement between S&ME and Alliance.

S&ME hereby acknowledges that this report may be relied upon by Alliance subject to the limitations of the current contract that makes up the agreement between S&ME and Alliance. A copy of this agreement is included in Appendix E.

According to standards set forth by ASTM 1527-05, an environmental site assessment meeting or exceeding this practice and for which the information was collected or updated within one year prior to the date of acquisition of the property or the date of the intended transaction may be used provided the following components were conducted or updated within 180 days of the date of purchase or the date of the intended transaction:

- 1. Interviews with owners, operators, and occupants;
- 2. Searches for recorded environmental cleanup liens;
- 3. Reviews of federal, tribal, state, and local government records;
- 4. Visual observations of the property and of adjoining properties; and
- 5. The declaration by the environmental professional responsible for the assessment or update.

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

The subject site is located southwest of the I-385/ U.S. Highway 221 interchange and approximately two miles north of Laurens, Laurens County, South Carolina. The subject site is approximately 380 acres and consists of portions of Laurens County tax parcels 906-00-00-005, 906-24-01-006, and 906-24-01-012. The parcels are owned by two elements of Laurens County including City of Laurens and Laurens Timberland, LLC. The approximate location of the site is depicted on Figures 1-3 in Appendix A.

2.2 Site and Vicinity Description

The site is located within the Hunter Industrial Park in a rural area of northern Laurens County. Properties surrounding the site consist of timber land and light industrial facilities. Other properties in the vicinity include timber land, residences, and commercial facilities along the highway corridors. Rolling topography is present in the vicinity of the site. The overall slope of the site is toward the southwest. The major drainage feature in the area is the Little River located approximately one mile southwest of the subject site.

2.3 Current Use of the Property

The site is currently vacant wooded land and cut-over wooded land.

2.4 Descriptions of Roads, Structures, and Other Improvements on the Site Ingress and egress to the site are from Hunter Industrial Park Drive which bisects the site. Several unpaved roads and an unpaved parking lot were observed throughout the property. No additional structures or other improvements were observed on the site.

2.5 Current Uses of the Adjoining Properties

Adjoining properties to the south, southeast, and southwest consist of timber land. Properties to the north, northeast, and northwest consist of light industrial facilities that compose the Hunter Industrial Park. Please refer to Section 5.2.3 (Current Uses of Adjoining Properties) for a more detailed account of adjoining property use.

3.0 USER PROVIDED INFORMATION

This section is provided to summarize information provided by the user that may help in identification of RECs. As is discussed in ASTM Practice E-1527-05, the environmental professional does not typically generate this information.

3.1 Title Records

The user did not provide a copy of land title records for the site.

3.2 Environmental Liens or Activity and Use Limitations

Reasonably ascertainable recorded land title records may contain *environmental liens* or *activity and use limitations* recorded against the property. ASTM Practice E 1527-05 does not impose on the environmental professional the responsibility to check for recorded environmental liens or activity and use limitations. The user of the Phase I ESA is responsible for determining, through their choice of a title company, title professional, or attorney, whether any environmental liens have been recorded against the property. The user did not provide information on environmental liens, AULs or ECs for the site.

3.3 Specialized Knowledge

The user did not indicate specialized knowledge related to the site.

3.4 Commonly Known or Reasonably Ascertainable Information

The user did not provide commonly known information or provide information regarding any reasonably ascertainable sources of data.

3.5 Valuation Reduction for Environmental Issues

The user did not indicate value reduction for environmental issues.

3.6 Owner, Property Manager and Occupant Information

The user provided site contact information for the current representative of the property owner, Mr. Irvin D. Satterfield with Laurens County.

3.7 Reason for Performing Phase I ESA

A reason for performing this Phase I ESA was not provided. In the absence of a specific reason, we have assumed the Phase I ESA was performed to identify, to the extent feasible pursuant to ASTM E 1527-05, *Recognized Environmental Conditions* (RECs) in connection with the site. This practice is intended to permit a user to satisfy one of the requirements to qualify for the "innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations to CERCLA liability."

3.8 Other

No other user-provided information was provided for review.

4.0 RECORDS REVIEW

4.1 Standard Environmental Record Sources

S&ME contracted Environmental Data Resources (EDR) to prepare a Radius Map Report compiling federal and state environmental database information from the regulatory records of the United States Environmental Protection Agency (USEPA), the United States Geological Survey (USGS), and the South Carolina Department of Health and Environmental Control (SCDHEC). The purpose of the EDR report was to identify environmental sites and activities within a designated radius of potential concern from the subject site, as outlined by ASTM E 1527-05.

General descriptions of the databases are included within the EDR report, which is attached in Appendix C. The major databases reviewed along with the date the information was issued, and the search radii employed are provided in the following table.

Table 1: List of Databases Searched

Database	Approximate Search Distance	Search Results (number of sites)				
Federal Environmental Record Sources						
NPL	1 mile	0				
Proposed NPL	1 mile	0				
DELISTED NPL	1 mile	0				
NPL LIENS	TP	0				
CERCLIS	0.5 mile	0				
CERCLIS-NFRAP	0.5 mile	0				
CORRACTS	1 mile	0				
RCRIS-TSD	0.5 mile	0				
RCRIS-LQG	0.25 mile	0				
RCRIS-SQG	0.25 mile	4				
ERNS	TP	0				
HMIRS	TP	0

MINES	0.25 mile	0				
FINDS	TP	0				
RAATS	TP	0				
State	Environmental Record Sources					
Hazardous Waste (SWHS)	1 mile	0				
NON HSI	1 mile	0				
Landfills (SWF/LF)	0.5 mile	0				
LUST	0.5 mile	4				
UST	0.25 mile	6				
Spills	TP	0				

Database	Approximate Search Distance	Search Results (number of sites)			
Tribal Records					
Indian Reservations	0.25 mile	0			
Indian LUST	0.25 mile	0			
Indian UST	0.25 mile	0			

TP = Target Property

S&ME evaluated the EDR report for regulated sites located within the ASTM-designated search radii. The EDR Radius Map Report also contains an Orphan Summary which lists facilities that are believed to be in the area of the site, but cannot be located due to incomplete address information. The site was not listed on reviewed regulatory databases. The vehicular reconnaissance identified no additional obvious facilities within one-half mile of the subject site.

The public record review, including the EDR Radius Map Report, identified four (10) listing with records pertaining to hazardous substances or petroleum products within the ASTM-specified search distances. Regulatory records are documented in Appendix B.

Table 2: Database Search Results

Facility	Location Direction/ Distance Topographic Relationship	Record	Comment
Fukoku America, Inc.	325 Hunter Industrial Park Road West adjoining Downgradient	RCRA-SQG	Facility manufactures rubber goods for automobile equipment and generates small quantities of spent solvents and spent solvent mixtures. No known releases have been reported. Compliance violations were reported in December 2004 but achieved compliance on June 21, 2005.
Unifor Brass Forging, Inc.	499 Hunter Industrial Park Road Northwest adjoining Downgradient	RCRA-SQG	Facility manufactures brass parts and fittings. Listed on the state database as minor air emitter. No known releases or violations have been reported.
Hickory Tavern	The location of this facility was not confirmed and it is thought to be located outside the search radius. Town of Hickory Tavern is located several miles west of site. UST		Facility formerly maintained a 6,000 gallon kerosene tank. According to SCDHEC no known releases or violations have been reported and the tank was removed from the ground in 1992.
Box USA Group, Inc./ International Paper	Hwy 221 and I-385 500 ft North Upgradient	RCRA-SQG	Listed on the state database as minor waste generator. No known releases or violations have been reported.

Facility	Location Direction/ Distance Topographic Relationship	Record	Comment
Walmart Distribution Center 14 & 15	1050 Vern Cora Road 500 ft. E Crossgradient	UST, GWCI, LUST	Facility is goods distribution center. Three 20,000-gallon diesel USTs, one 2,000-gallon waste oil UST, and one 6,000-gallon motor oil UST are currently in use. Two petroleum releases are shown on the SCDHEC database. The first release was reported on 11/16/1994 and the letter of No Further Action (NFA) was given 5/19/1995. The second petroleum release was reported on 6/12/1996 and the NFA letter was issued 6/26/2000.
St. Joe Container Co.	Hwy 221 and I-385 750 ft. North Downgradient	UST, LUST	Formerly maintained two (2) 8,000-gallon diesel tanks. A release was confirmed by SCDHEC on 8/31/1992. The tanks have been removed from the site and a letter of NFA was issued on 8/31/1992.
Builders Transport, Inc.	Hwy 221 and I-385 750 ft. North Upgradient	RCRA-SQG	Listed on the state database as minor waste generator. No known releases or violations have been reported.
Ernestine Starnes Property	U.S. Highway 221 1,000 ft. Southeast Crossgradient	UST, GWCI, LUST	Formerly maintained two (2) 550-gallon gasoline tanks. A release was confirmed by SCDHEC on 8/7/1995. The tanks have been filled on site but a letter of No Further Action (NFA) has not been issued.
Cox's Gulf Service	Lucas Avenue 1,000 ft. Northeast Downgradient	UST, GWCI, LUST	Formerly maintained three (3) 3,000-gallon gasoline tanks. A release was confirmed by SCDHEC on 3/23/1992. The tanks have been removed from the site and an NFA letter of was issued on 7/7/1995.
J C's Auto Truck	21500 Enoree Road 1,000 ft. Northeast Downgradient	UST	Facility is an active fuel retailer and maintains two (2) 10,000-gallon gasoline tanks and one (1) 10,000 gallon diesel tank. To the best of our knowledge, the facility has not reported a release to SCDHEC. The site was found to be in compliance on 5/17/2010.

4.2 Additional Environmental Record Sources

• A search of the Environmental Protection Agency (EPA) Envirofacts database (http://maps.epa.gov/enviromapper) was conducted. The subject site did not appear on the database. No additional facilities were identified within the search radii.

• S&ME also searched the SCDHEC Land and Waste Management on-line database website (http://www.scdhec.net/environment/lwm/databases.htm) for public records (land use controls, etc.), mining and solid waste facilities, and the Underground Storage Tank Registry. No additional facilities were identified.

4.3 Physical Setting Sources

The site is identified on a USGS 7.5-minute series Topographic Map, titled Laurens North, South Carolina Quadrangle dated 1983. The original map has a scale of one inch equals 2,000 feet. A portion of the Topographic map depicting the subject site is included as Figure 2 in Appendix A.

The map depicts the site as wooded and cleared land with several unpaved roads and streams. The site is shown southwest of the intersection of U.S. Highway 276 and U.S. Highway 221. The property to the north is shown as an industrial facility with labeled "Industrial Waste Ponds." A railroad is depicted to the east of the site as are several residences. Other surrounding properties are shown as wooded or cleared land. Topography in the area is rolling. Slope in the site vicinity is generally to the southwest. Surface elevation on the site ranges from approximately 620 to 720 feet above Mean Sea Level (MSL).

S&ME also reviewed historic topographic maps on-line via the online system at the Thomas Cooper Library (http://www.sc.edu/library/digital/collections/topomaps.html). A topographic map (Fountain Inn, SC) was located for the year 1957. The map depicts the site as mostly wooded land with a few structures and roads on cleared areas. Several small ponds are located to the north of the site and tributaries of the Little River are shown on the site. A railroad and U.S. Highway 221 bound the site to the east and a paved road is shown north of the site.

The subject site is located in the Piedmont Region of South Carolina which consists of a mosaic of Precambrian and Paleozoic metamorphic and igneous rocks with irregularly shaped dissected plains and hills.

S&ME reviewed the *Soil Survey of Laurens and Union Counties* which depicts the soil types underlying the subject site and its surrounding area. The survey depicts the subject site as being underlain by the following soils:

Table 3: Soil Series

Soil Series	Drainage	Permeability	Location
Appling loamy sand (ApB, ApC)	Well	Moderate	Broad ridges
Cataula sandy clay loam(CeB2,CeC2)	Well	Moderate	Ridgetops
Cecil sandy loam (ClB,ClC2, ClD)	Well	Moderate	Side slopes
Chewacla and Worsham (Cw)	SW Poor	Moderate	Depressions

Colfax loamy sand (CxB)	SW Poor	Slow	Drainageways
Enon sandy loam (EnB, EnC)	Well	Slow	Medium ridges
Madison and Pacolet (MhF)	Well	Moderate	Near streams
Vance sandy loam (VaC)	Well	Moderate	Narrow ridges
Wilkes soils (WlF)	Well	Moderate	Side slopes

4.4 Historical Use Information on the Property

The historical use of the subject site was determined by reviewing various historical sources listed below. In summary, the site historically consisted of wooded land and agricultural land with residences from at least 1941 until the 1950's. By 1964, the subject site appears to be vacant, wooded land with a few clearings and unpaved roads. Beginning in the 1990's until the present, Hunter Industrial Park Road was added and portions of the site have been timbered.

Aerial Photographs

Aerial photographs (1941-2009) were reviewed to observe previous conditions and development of the subject site, as well as immediately adjacent properties. A copy of the 2009 aerial photograph is included as Figure 3 in Appendix A. The following table presents the findings of the aerial photograph review.

Table 4: Aerial Photographs – Subject Site

Tuble 4. Refuir Hotographs Subject Site				
SOURCE	DATE	APPROX. SCALE	COMMENTS	
Laurens County GIS Aerial Photograph	2009	1" = 400'	The site is depicted as timber land and cut-over timber land. It is shown to the southwest of Interstate 385 and U.S. Highway 221interchange. Several paved and unpaved roads are depicted on the site. Immediately surrounding properties are shown as light industrial operations or wooded land. Other properties in the vicinity are shown as commercial businesses, residential neighborhoods, and wooded parcels.	
SCDNR Website NAPP Aerial	2006	1" = 400'	Similar to 2009. Site is shown as mostly wooded land with some cut-over land in the northern portion.	
Google Earth	2005	1"= 400"	Similar to 2006.	
SCDNR Website NAPP Aerial	1999	1"= 400'	Similar to 2005. The subject site is wooded land and four of the seven surrounding light industrial facilities are either not depicted or are shown as smaller in size.	

USGS Aerial	1994	1"= 400'	Similar to 1999. Hunter Industrial Park Road is shown and two large light industrial buildings are depicted near the site. The larger facility (Wal-Mart) is shown to the east of the site, across U.S. 221. The smaller is shown north of the site across I-395.
USC Map Library, Columbia, SC	1981	1" = 1,320'	The site is shown as wooded land with several unpaved roads. Two small clearings, possibly with structures are depicted on the site. One commercial facility is shown to the north of the site and other surrounding properties are wooded land or residential parcels.
USC Map Library, Columbia, SC	1970	1"= 1,320"	Similar to 1981.
USC Map Library, Columbia, SC	1964	1"= 1,320"	Site is shown as wooded land with two cleared areas and several unpaved roads. The commercial facility is not shown to the north of the site and surrounding properties are depicted as wooded land, cleared land, and residential parcels.
USC Map Library, Columbia, SC	1949	1"= 1,320"	Similar to 1964. Site and surrounding properties are shown as cleared and wooded land with a few residences. The interstate is not shown to the north of the site.
USC Map Library, Columbia, SC	1941	1"= 1,320'	Similar to 1949.

There was no direct evidence on the reviewed aerial photographs indicating that open dumping, or hazardous material use or storage has occurred on or near the subject site. However, the scales and clarity of several of the reviewed aerial photographs inhibited the identification of specific site use or activities.

Sanborn Maps

S&ME contracted with EDR to conduct a database search of Sanborn Fire Insurance maps that depicted the subject site. EDR maintains the largest library of Sanborn Fire Insurance maps available. A search of available maps revealed no coverage for the site area (Appendix B).

City Directories

City directories were previously reviewed at the Laurens County Library. According to the records, listings were not available for the site area.

Tribal Records

The review of the public record including the EDR Radius Map Report did not reveal any listings of tribal environmental records (Indian Reservations, Indian UST, or Indian LUST). According to a fact sheet obtained from the National Indian Child Welfare Association, there are no recognized Tribal lands within the vicinity of the subject site. The site does not appear to be located on or near any tribal lands. According to the U.S. Census, the Catawba Indian Nation in York County is the only federally recognized tribe

in South Carolina. South Carolina began to offer state recognition to tribes in early 2005. S&ME reviewed the South Carolina Indian Affairs Commission website (http://southcarolinaindianaffairs.com/members.html) as well as the websites of two state recognized tribes, the Pee Dee Indian Tribe (http://www.peedeeindiantribeofsc.com/) and the Waccamaw Indian Tribe (http://www.waccamaw.us/FRAME_HOME.htm), and one unrecognized tribe, the Marlboro, Chesterfield, Fairfield County Pee Dee Indian Tribe (http://mcdcpeedeeindiantrib.tripod.com/), for any information regarding environmental concerns. These sources did not contain information regarding environmental issues.

Building Records

S&ME attempted to review building records on the Laurens County GIS website http://www.laurenscountygis.org/laurensgis/laurensgis_main.html. No building records were available for the site.

Zoning/Land Use Records

According to information from the South Carolina Department of Commerce, the site is zoned for manufacturing and surrounding land use is industrial.

Land Title Records

Land title records were not provided by the user. According to the Laurens County GIS records, the site is composed of three tax parcels totaling approximately 380 acres. The parcels are owned by two elements of Laurens County including City of Laurens and Laurens Timberland, LLC.

Property Tax Files

S&ME attempted to review property tax files on the Laurens County GIS website http://www.laurenscountygis.org/laurensgis/laurensgis_main.html. No property tax records were available for the parcels that compose the subject site.

4.5 Historical Use Information of Adjoining Properties

The historical use of the adjoining properties was determined by reviewing historical topographic maps, historical aerial photographs, county tax assessor records, and city directories. These historical documents indicated the surrounding properties have consisted of wooded land, agricultural land, and a few residential parcels from at least 1941 until the late 1960s. The interstate to the north of the site first appears in the 1966 aerial photograph and the industrial building north of the site was constructed in 1970. The Wal-mart distribution center was constructed to the east of the site in 1988. The majority of the light industrial park to the east is first visible in the 1999 aerial photograph. The Koerber facility to the east of the site and the Kimura facility to the west were both constructed in 2002. Portions of the northern and southern adjoining properties were cleared around 2005.

5.0 SITE RECONNAISSANCE

A site visit was conducted on July 22 and 29, 2010 by S&ME environmental professional, Chris Daves and S&ME Biologist Amanda White. The purpose of the site reconnaissance was to observe the current uses of the site, adjoining properties, and properties in the surrounding area, as well as the geologic, hydrogeologic, and topographic conditions of the site and the surrounding area. Photographs were taken of various portions of the subject site to document existing conditions. Copies of pertinent photographs are included in Appendix A of this report.

5.1 Methodology and Limiting Conditions

The subject site was observed by walking the perimeter and interior of the site with emphasis on trails, cut roads, or other signs of human encroachment. No other limiting conditions were encountered. A vehicular tour of the area was made to confirm the locations of facilities listed by regulatory agencies and to verify nearby land use. The tour involved viewing nearby properties from publicly accessible areas, but not entering private property. Observation of nearby properties was limited to areas visible in the line of sight from public roadways. S&ME did not enter adjacent properties to view areas not visible from the subject site or public property.

5.2 General Site Setting

5.2.1 Current Use(s) of the Property

The site is currently vacant cleared land, cut-over timber land, and timber land (Photographs 1 and 2).

5.2.2 Past Use(s) of the Property

Site observations did not reveal previous uses of the subject property that are different from the current uses.

5.2.3 Current Uses of Adjoining Properties

North: The site is bound to the north by Interstate 385. The Box USA, Inc.

(manufactures corrugated containers) facility was located to the northeast of the

site and wooded land was observed to the northwest.

South: Wooded land and cut-over wooded land were located south of the site

(Photograph 3).

East: Several light industrial facilities located in the Hunter Industrial Park were

observed to the east of the subject site. These businesses include Unifor–Brass Forging (Photograph 4), Unifor–Aluminum, Fukoku, Koerber (manufactures complex machined aluminum parts for tier 1 automotive suppliers), and Wal-Mart Distribution Center (Photograph 5). Wooded land and cut-over land are

located to the southeast of the subject site.

West: The Kimura facility (Photograph 6), which manufactures steel containers and

racks for the automotive market, and wooded land are located west of the site.

5.2.4 Past Uses of Adjoining Properties

Site observations did not reveal previous uses of the adjoining properties that are different from the current uses.

5.2.5 Geologic, Hydrogeologic, Hydrologic, and Topographic Conditions

Topography in the area is rolling and the general slope of the site is to the southwest. Observable surface soils appeared to consist of sandy loams and sandy clay loams. Several small wetland areas (Photograph 7) were observed in the southern portion of the site. Surface water was not observed in these wetland areas. A detention pond was observed in the northern portion of the site (Photograph 8). Several streams and drainage features were observed on the site (Photograph 9). Regional groundwater flow can be assumed to roughly mimic the surface topographic slope. No confirmation of surface run-off or groundwater conditions was made during the site reconnaissance.

5.2.6 General Description of Roads, Structures & Other Improvements

Ingress and egress to the site are from Hunter Industrial Park Road to the north and east, Cherry Blossom Road to the west, and several unpaved roads throughout the site (Photograph 10). A graded lot, adjoining gravel parking (Photograph 11), and a detention pond were noted in the northern portion of the site. No structures or other improvements were observed on the site.

5.2.7 Potable Water Supply and Sewage Disposal System

The subject site is currently not connected to municipal water and sewer lines, however, these utilities are available to the area. No visual evidence of drinking water wells or septic systems was observed.

5.3 Exterior Observations

The site is currently timber land and cut-over timber land. Unpaved roads and cleared areas were observed on the site and the northern portion of the property contains a graded lot, gravel parking area, and a detention pond. Easements for power and sewer lines were observed in the eastern and western portions of the site (Photograph 12). A small amount of solid waste (bottles, cups, etc.) was observed in the areas around the roads and surrounding industries. No visible signs of buried waste, above or underground storage tanks, subsidence, or unusual soil discoloration which may indicate the possible presence of contaminants on the site were observed.

5.4 Interior Observations

No structures were identified on the site and therefore no interior observations were made.

6.0 INTERVIEWS

Interviews were conducted by S&ME Biologist Amanda White, under the direction of an S&ME Environmental Professional, to obtain information from individuals who have knowledge of current and past activities at the site, and to clarify observations made during the site reconnaissance or data review of the site. Copies of interview correspondence are located in Appendix D.

6.1 Interview With Owner

The user forwarded the Owner Questionnaire to a representative of the owner, Mr. Dale Satterfield with Laurens County Public Works. Mr. Satterfield reported that the site was previously used for farming and that the area was currently part of the Hunter Industrial Park. He was not aware of hazardous material responses, spills, open dumping, site filling, or land restrictions associated with the property.

6.2 Interview with Key Site Manager

See Section 6.1.

6.3 Interview with Occupants

There are no occupants of the site.

6.4 Interview with Local Government Officials

On August 12, 2010, S&ME contacted Captain Tim Robbins of the City of Laurens Fire Department. Captain Robbins stated he was familiar with the site and prior to the development of the surrounding industrial park it was wooded land. He stated that his station occasionally responded to false alarms at the adjacent industries but he was not aware of fires, spills, hazardous waste, or landfills on the site.

6.5 Interviews with Others

No other interviews were conducted for this assessment.

7.0 FINDINGS

7.1 On-Site Findings

No on-site findings of potential environmental concern were identified.

7.2 Off-Site Findings

The review of the public record including the EDR Radius Map Report and other public records identified ten off-site facilities with listings related to hazardous materials or petroleum products in the vicinity of the subject site.

- **Fukoku America, Inc.** This facility is located on an adjoining property to the west and upgradient from the subject site. It is listed on the RCRA-SQG database and reported a compliance violation on 12/6/2004. No known releases have been reported and the facility was found in compliance on 6/20/2005.
- <u>Unifor Brass Forging, Inc.</u> This facility is located on an adjoining property to the east and upgradient from the subject site. It is listed on the RCRA-SQG database and there are no known releases or records of violations.
- **Box USA Group, Inc./ International Paper** This facility is located 500 ft. to the north and upgradient from the subject site. It is listed on the RCRA-SQG database and there are no known releases or records of violations.
- Wal-mart Distribution Center This facility is located 500 ft. to the east and crossgradient from the subject site. It is listed on the UST, LUST, GWCI, and RCRA-SQG databases. The facility maintains three 20,000-gallon diesel USTs, one 2,000-gallon waste oil UST, and one 6,000-gallon motor oil UST. Two petroleum releases are shown on the SCDHEC database. The first release was issued an NFA letter on 5/19/1995. The second petroleum release was issued an NFA letter on 6/19/1995.
- **Builders Transport, Inc.** This facility is located 750 ft to the north and downgradient from the subject site. It is listed on the RCRA-SQG database and there are no known releases or records of violations.
- St. Joe Container Co. This facility is located 750 ft to the north and downgradient from the subject site. It is listed on the UST and LUST databases. The facility formerly maintained two (2) 8,000-gallon diesel tanks. A release was confirmed by SCDHEC on 8/31/1992. The tanks have been removed from the site and a letter of NFA was issued on 8/31/1992.
- Ernestine Starnes Property This facility is located 1,000 ft to the southeast and crossgradient from the subject site. It is listed on the UST, LUST, and GWCI databases. The facility formerly maintained two (2) 550-gallon gasoline tanks. A release was confirmed by SCDHEC on 8/7/1995. The tanks have been filled on site but a letter of NFA has not been issued.
- <u>Cox's Gulf Service</u> This facility is located 1,000 ft northeast and downgradient from the subject site. It is listed on the UST, LUST, and GWCI databases. The facility formerly maintained three (3) 3,000-gallon gasoline tanks. A release was confirmed by SCDHEC on 3/23/1992. The tanks have been removed from the site and an NFA letter of was issued on 7/7/1995.
- <u>JC's Auto Truck</u> This facility is located 1,000 ft northeast and downgradient from the subject site. It is listed on the UST database. The facility is an active fuel retailer and maintains two (2) 10,000-gallon gasoline tanks and one (1) 10,000 gallon diesel tank. To the best of our knowledge, the facility has not reported a release to SCDHEC. The site was found to be in compliance on 5/17/2010.

8.0 OPINIONS

8.1 On-Site Opinions

No on-site findings of potential environmental concern were identified, and therefore no opinions are rendered.

8.2 Off-Site Opinions

S&ME offers the following opinion regarding the off-site findings of potential environmental concern identified during this Phase I ESA:

• In our opinion, the identified off-site regulated facilities do not appear to constitute a REC in connection with the subject site at this time based on topographic position relative to the site, distance, and/or current regulatory status.

8.3 Data Gaps

Data gaps encountered during the performance of the Phase I ESA is that the operational history of the site was not able to be traced in approximately 5-year intervals, because standard historical sources, such as additional aerials photographs, city directories, or Sanborn Maps, were not readily ascertainable to obtain the information. A complete chain of title was not provided for review of AULs, ECs, or environmental liens. These data gaps are not considered significant because of the apparent past use of the site for residential, agricultural, and silvicultural purposes.

9.0 CONCLUSIONS

S&ME has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-05 of the approximate 380-acre site. The property is located southwest of the intersection of Interstate 385 and U.S. Highway 221 approximately two miles north of downtown Laurens in Laurens County, South Carolina. The subject site is part of the Hunter Industrial Park and consists of Laurens County tax parcels 906-00-00-005, 906-24-01-006, and 906-24-01-012. Any exceptions to, or deletions from this practice are described in Sections 1.4 and 10.0 of this report. *This assessment has revealed no evidence of RECs in connection with the subject site*.

10.0 DEVIATIONS

S&ME has endeavored to perform this Phase I ESA in conformance with the scope and limitations of ASTM E 1527-05. The environmental professionals who performed the Phase I ESA did not feel the need to deviate from the standard.

11.0 ADDITIONAL SERVICES

S&ME performed a Protected Species Assessment and a Wetland Delineation on the site. These reports are presented under separate covers. No other additional services were performed for this assessment.

13.0 SIGNATURE(S) OF ENVIRONMENTAL PROFESSIONAL(S)

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professionals as defined in Section 312.10 of 40 CFR 312. We have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject site. We have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Chris Daves, P.W.S.

Biologist

Tom Behnke, P.G.

Environmental Department Manager

14.0 QUALIFICATION(S) OF ENVIRONMENTAL PROFESSIONAL(S)

The environmental professionals for this project are Mr. Chris Daves and Mr. Tom Behnke, P.G. Mr. Daves and Mr. Behnke meet the qualifications per 312.10 of 40 CFR Part 312. Mr. Daves has a B.S. in Biology and a M.S. in Earth and Environmental Resources Management and over nine years relevant work experience in environmental consulting. He has performed hundreds of environmental assessments for real estate transactions in South Carolina, North Carolina, and Georgia. He has also attended ASTM training for Phase I ESAs.

Mr. Behnke is the Environmental Department Manager in Columbia, South Carolina and is a Senior Hydrogeologist with over 20 years of experience. Projects he has managed include groundwater contaminant and flow evaluation; and Phase I & Phase II assessments for real estate transactions. Mr. Behnke is a senior reviewer for S&ME and has also attended ASTM training for Phase I ESAs.

Thank you for your business. Please contact EDR at 1-800-352-0050 with any questions or comments.

Disclaimer - Copyright and Trademark Notice

The EDR FieldCheck ®System enables EDR's customers to make certain online modifications to the maps and text contained in EDR Radius Map Reports. As a result, the maps and text contained in this Report may have been so modified. EDR has not taken any action to verify any such modifications, and this report and the findings set forth herein must be read in light of this fact. The EDR FieldCheck System accesses user-modified records from previously submitted reports. Any user-modified record from a previous report that is plotted outside the search radius of this report may not be included in this report.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2010 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). S&ME, INC. used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by S&ME, INC.. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

An online review and analysis by S&ME, INC. of the RCRA-SQG list, as provided by EDR, and dated 02/17/2010 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
FUKOKU AMERICA INC	325 HUNTER INDUSTRIAL P	0 - 1/8 (0.000 mi.)	1	7
UNIFOR BRASS FORGING INC	499 HUNTER IND PARK RD	SSW 0 - 1/8 (0.076 mi.)	2	17

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

An online review and analysis by S&ME, INC. of the RCRA-CESQG list, as provided by EDR, and dated 02/17/2010 has revealed that there are 3 RCRA-CESQG sites within approximately 0.25 miles of the target property.

INTERNATIONAL PAPER LAURENS CO	INTERSECTION HWY 221 &	NNE 1/8 - 1/4 (0.155 mi.)	B6	22

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Health & Environmental Control's Leaking UST list.

An online review and analysis by S&ME, INC. of the LUST list, as provided by EDR, and dated 05/27/2010 has revealed that there are 4 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Health & Environmental Control's list: Comprehensive Underground Storage Tanks.

An online review and analysis by S&ME, INC. of the UST list, as provided by EDR, and dated 05/27/2010 has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

GWCI: Groundwater Contamination Inventory Cases. Any site that has groundwater contamination over a federal MCL.

An online review and analysis by S&ME, INC. of the GWCI list, as provided by EDR, and dated 07/01/2008 has revealed that there is 1 GWCI site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Hazardous Waste Summary:

S30-54 3/4 MI S OF INT US76

Used oil transporter:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

> LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code:

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

> LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET. WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003

Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS

NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE

OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

SC-EFIS (South Carolina - Environmental Facility Information System) integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas. The EFIS was developed by the state of South Carolina and Maine joined their system in 2004.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

AUL: Land Use Controls

The term Land Use Controls or "LUCs" encompass institutional controls, such as those involved in real estate interests, governmental permitting, zoning, public advisories, deed notices, and other legal restrictions. The term also includes restrictions on access, whether achieved by means of engineered barriers (e.g., fence or concrete pad) or by human means (e.g., the presence of security guards). Additionally, the term includes both affirmative measures to achieve the desired restrictions (e.g., night lighting of an area) and prohibitive directives (e.g., restrictions on certain types of wells for the duration of the corrective action). Considered altogether, the LUCs for a facility will provide a tool for how the property should be used in order to maintain the level of protectiveness that one or more corrective actions were designed to achieve.

State and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Sites

Sites participating in the Voluntary Cleanup Program. Once staff and a non-responsible party have agreed upon an approved scope of work for a site investigation and/or remediation, the party enters into a voluntary cleanup contract. Staff oversees the cleanup efforts to ensure that activities are performed to our satisfaction. Upon completion of the negotiated work in the voluntary cleanup contract, the non-responsible party receives State Superfund liability protection.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

APPENDIX D INTERVIEW DOCUMENTATION

QUESTIONNAIRE FOR USER/OWNER

In order to assist in the environmental evaluation of the *Hunter Industrial Park, Laurens County*, *South Carolina (S&ME Project No. 1614-10-270)*, S&ME, Inc. requests that the User of the Phase I report complete this questionnaire. Answers should be brief. We will contact you if further information is needed.

****	****************************
1)	What are the present and previous land uses for the property? Previous - Farming Present - Industrial use
2)	What current operations, if any, are performed on the property?
2)	Manufacturing Industries
3)	Are (Were) there any underground storage tanks (USTs) on the property? If so, how many are there, what are they used for, and how big are they?
4)	Do you know of any environmental concerns (e.g., nearby landfills, chemical spills either on-site or nearby)?
5)	Do you know of any hazardous waste generators on-site or nearby?
6)	Do you know of any pending, threatened, or past litigation, administrative proceedings, or notices of violation from any governmental entity relevant to hazardous substances or petroleum products in, on, or from the property?
7)	Do you know of any environmental liens or activity use limitations on the property?
8)	Is there a value reduction of the property for environmental reasons?
T hana	by certify that the above information is true and correct.
1 nere	by certify that the above information is true and correct.
	1. To the standing of the stan
Signa	ture of Landowner or Client or person knowledgeable about the property.
	e than one individual provides information on this questionnaire, each should sign and indicate responses he or she has provided.

PHASE I ENVIRONMENTAL SITE ASSESSMENT USER FURNISHED INFORMATION

The following is a list of documents and information that could be useful to S&ME, Inc. in preparing your Phase I Environmental Site Assessment (ESA). Please check the appropriate boxes below, sign, and fax or mail (fax number 803-561-9177) this form along with the authorization to proceed and completed owner's questionnaire. We will contact you regarding review of any available materials. This form will be attached to, and made a part of, your completed Phase I ESA.

Yes	No	
X	1. 2.	r
	3.	Environmental permits (i.e. solid waste disposal permits, hazardous waste Disposal permits, wastewater permits, NPDES permits)
	X 4.	Registrations for underground and above-ground storage tanks
	5.	Material safety data sheets (MSDS)
	6.	Community right-to-know plan
	7.	Safety plans; preparedness and prevention plans; spill prevention, counter- Measure and control plans, etc.
\times	8.	
	> 9.	Notices or other correspondence from any government agency relating to Past or existing environmental liens encumbering the property
	X 10	Hazardous waste generator notices or reports
X		. Geotechnical studies
		. Information concerning any pending, threatened, or past litigation or
		Administrative proceedings relevant to hazardous substances or petroleum Products
	13	. Notices from any governmental entity regarding any possible violation of
لسسا		Environmental laws or possible liability relating to hazardous substances or petroleum products
	14.	Disclosure of sumps, pits, drainage systems (i.e. the existence of and location)
X		. Building plans (architectural, utility, structural)
\times	16.	Description of current site operations, including layout drawings or sketches
\times	17.	. Title report/chain-of-title
\times		. Tax assessor records (previous owner and occupants)
\times		Purchase price analysis (if lower than comparables)
\boldsymbol{X}		Current and historical photographs of the site
	21.	Current and historical topographic maps of the site

I have reviewed the above list and checked the "Yes" box for those items that would be available to S&ME for review and/or copy.

FIRM: City of Laurens	Fire Department		FIRM: S&ME, Inc.

CONVERSATION

S&ME, Inc.	Other Party
Site within Hunter Industrial Park south of the in I-385/ Highway 221 Interchange.	He stated that the site was within City of Laurens jurisdiction and he was very familiar with the area. To the best of his knowledge it was wooded land prior to the development of the industries there would be no source of contamination. Captain Robbins was not aware of onsite dumping or hazardous waste.
Other concerns? On the site itself or the adjacent roads?	He mentioned that outside the occasional false alarm had not responded to any major fires, spills, or releases of hazardous materials on the site or in the immediate vicinity.
